WARRANTY

All Surgical Scrub Sinks manufactured by LOGIQUIP will carry a limited lifetime warranty against manufacturing defects and a one year parts and labor warranty. The factory will service all units without cost to the buyer for one year from shipment. After the one year period, replacement of a defective part will be at buyer’s expense. We will exchange all defective parts at no cost to the buyer for a period of one year from shipment. All defective parts must be returned within 30 days to ensure proper credit. An RMA from LOGIQUIP must be obtained prior to items return.

SS SERIES SURGICAL SCRUB SINKS

Developed to be the answer to space and economical constraints, our ES series scrub sinks are answer. The ES series sinks have a smaller outside dimension but still have a deep basin to allow for a proper scrub. The operation of the ES sinks is the same as that of the SS series sinks but the features do vary.

ES Series Scrub Sink Standard Features:
• Deep sloping basin
• Adjustable thermostatic controlled pressure regulating mixing valve, one per station mounted under sink
• High mount swivel gooseneck spout with adjustable swivel spray aerator
• Flow control valve
• Backflow preventers
• Infrared sinks are equipped with a 24 volt plug in transformer
• 304 Stainless Steel polished and ground to a #4 finish

Knee Operated Surgical Scrub Sinks:
The operation of these sinks is simple. Press the knee panel one time to activate water flow. Press again to stop flow. The soap panel works in a pumping fashion with soap being dispensed through a stainless steel spout located near the mixing valve. The base has been designed to accommodate gallon sized soap container storage behind the knee panels.

Infrared Operated Surgical Scrub Sinks:
The infrared sensor is located on the front of each station and is activated by the user’s waist. There is a 2 second on/off delay for water flow. The sensor range is 12”-14”. Both features combined eliminate activation by simply passing by. Optional knee operated or foot control soap pumps are available.

Deluxe Surgical Scrub Sinks:
Built as a hybrid, these sinks have dual controls. Equipped with both infrared control as well as manual buttons for knee operated water and soap. The main operation is via the infrared sensor located between the knee panels. The knee operation for water control is on standby as a backup.

How To Order ES Series Sinks:
Options Available
Infrared Operation
Manual operation with three soap stations
Knee Operated Water and Soap (2 sinks)
Digital Scrub Timers
Eye Wash
220-240V Electrical

How To Order SS Series Sinks:
Options Available
Infrared Operation
